Wisconsin Emergency Management

2016 Resource Guide

Mission Statement

Wisconsin Emergency Management (WEM) coordinates effective disaster response and recovery efforts in support of local governments. Through planning, training and exercising we prepare ourselves, our citizens and response personnel to minimize the loss of lives and property.

Regional Emergency All-Climate Training Center (REACT) - Volk Field

The Regional Emergency All-Climate Training Center (REACT) provides both military and civilian first responders with advanced training and realistic experience in conducting specialized rescues involving collapsed structures, confined space, ropes and trenches.

The 15-acre training facility is located at Volk Field in Central Wisconsin and provides year round training in technical rescue. REACT has a state of the art classroom facility for 100 persons with distance learning capability as well as the training ground. A second classroom is also available during training and exercises.

REACT Center was recently awarded "Pro Board" Accreditation and is partnering with Texas Engineering Extension Service (TEEX) to further enhance training capability.

For more information about the REACT Center, visit http://react.wi.gov

WEM Training Portal

Wisconsin Emergency Management has an online training portal at www.trainingwisconsin.org. This system is used for the registration process for various training programs offered through WEM.

The website allows emergency managers, first responders, and others from across the state to register online for local, state, and federal classes. The training portal allows the student to keep track of their completed courses and print certificates. The full catalog of courses from WEM and its partner agencies is available on the site. Users can view upcoming sessions and any required prerequisites for the training.

For additional information about the WEM training portal, please contact Gary Wieczorek, Program Supervisor: gary.wieczorek@wisconsin.gov or 608-242-3213.

Wisconsin State Emergency Operations Center

When an emergency occurs, each state agency carries out its responsibilities independent of other agencies. The activities of state agencies must be closely coordinated if the state is to respond effectively. The purpose of the State Emergency Operations Center is to facilitate that coordination. The EOC has five levels.

Level 1 Event (Full-Scale SEOC Operations)
Level 1 is a full activation of the State EOC with WEM, DMA, DHS (Dept. of Health Services), DNR, DOT Highways, State Patrol, DATCP, and DOC having representatives in the EOC. Other state agencies and volunteer organizations will be requested to send representatives depending on the nature of the event and the need for additional support to local jurisdictions.

Level 2 Event (Partial SEOC Operations)
Level 2 is a partial activation of the State EOC with WEM, DMA, DHS, DNR, DOT Highways, State Patrol, and voluntary organizations having representatives in the EOC.

Level 3 Event (Minimal SEOC Operations) A Level 3 elevation supports smaller scale incidents and actively monitor severe weather conditions in the state. Minimal WEM and appropriate state agency staff will report to the EOC.

Level 4 Event (Virtual SEOC Operations) The SEOC operates in a virtual environment using an E-Sponder site. Staff participate from remote locations, monitoring events and communicating with other agencies.

Level 5 (Steady State Operations) The WEM Duty Officer is on call 24 hours a day to receive calls from counties and local jurisdictions relating to emergency situations. A member of WEM management is also on call as the Senior Duty Officer to provide management direction to the Duty Officer when necessary.

Wisconsin Emergency Management Equipment

WEM's mobile communications center is designed to provide interoperable communications throughout the State of Wisconsin. The unit has a complete suite of HF, VHF, UHF and 700-800 MHz radios with enough capacity to load the primary radio frequency of nearly every first responder agency in Wisconsin as well as the full suite of mutual aid frequencies.

The unit has both the VTAC36 and MARC repeaters on board, ACU 1000 and ACU 2000 for radio band/ channel cross patching and VOIP communications, a mast-mounted camera, a weather station, four flat-screen monitors, an office suite and a 1.8 meter satellite dish.

This 21-foot fully self-contained command post trailer is available to local communities to use. It also contains an ACU 1000 communications unit.

The 80-foot self-erecting portable tower can be used to help extend radio coverage. In addition, the top platform has six lights which can light an area the size of a football field.
